

GRABIMED C/F

GRABIMED C/F is a mattress protector, which can be used both as a cover and as a drawsheet. We recommend it mainly to hospitals and social institutions, but it can also do a good service in home care.

Its waterproof surface hinders contamination of the mattress, which extends the life of the bed. From the surface of GRABIMED C/F the dirt can be easily removed, it can be washed up to 90°C. Even after long-term use it does not absorb odors and remains soft.

It also contains a flame resistant additive that makes it even safer to use.
